

Adverse Weather Policy

Due to much of our surveying and setting out equipment being of high value and not all fully resistant to all elements we reserve the right to cease works under the following bad weather conditions.

1. Consistent wind speeds of over 22mph
2. Wind gusts of over 26mph
3. Consistent heavy rainfall
4. Constant heavy snowfall
5. High temperatures in excess of 38°C

In some cases, very fine rain, low fog or mist can make measurements unable to operate reliably.

This could therefore be unworkable, and works may have to cease.

Please note we would only intend to use this policy should we feel there is a significant risk to our high value equipment.
